

# Infor EAM Fleet Management

## Take control of your performance

Real-world fleet operations are capital-intensive, and success hinges on how well you can track and manage your vehicles and capitalize on opportunities for productivity and cost-per-mile savings. Proactively managing performance is more important than ever. And, with all the pressures enterprises contend with to deliver optimal results, asset management is critical.

### Track all of your physical assets and their needs

Trucks, buses, utility, construction, heavy equipment, commercial transportation, and rail fleets—no matter what kind of assets you're running, you need the backing of technology that can drive rapid results.

With Infor® EAM Fleet Management, you can track all of your physical assets, schedule preventive and predictive maintenance, manage spare parts, and create paperless business processes with handheld technology. Not only that, its modular design makes this dynamic component easy to tailor to your particular needs.

- Improve your visibility into all of your physical assets and their maintenance needs with Infor EAM Fleet Management.

## Manage your fleet with a trusted solution

Infor has more than 30 years of experience in enterprise asset management (EAM), and Infor EAM Fleet Management has a proven track record for delivering innovation and value to leading companies managing fleets. This best-in-class, feature-rich asset and maintenance component makes it easier to process warranty claims, and better manage tires and fuels. Vehicle performance also improves through more comprehensive maintenance.

## Improve your operations and costs

Companies around the globe rely on Fleet Management to optimize the efficiency of their fleets, and to reap the benefits of greater fleet performance and lower downtime for increased productivity and savings. Fleet Management does this by helping organizations like yours reduce breakdowns, track repair histories, and create dependable management of asset warranties. It allows you to track vehicle maintenance, improve tire management, and track warranty information using these key features:

### **Vehicle maintenance reporting standards**

**(VMRS)**—With the automatically populated VMRS standard codes provided by Fleet Management, you can accurately track your maintenance activities for all the vehicles in your fleet and profit from enhanced reporting.

**Fuel management**—Handle on-site fuel inventory with greater ease and efficiency. On top of that, by integrating Fleet Management with fuel card management systems, you can also track your company's vehicles, fuel, oil, and other fluid.

**Tire management**—Benefit from pinpoint tracking—capture data for each tire, such as ID, description, accrued cost, and work order history for each vehicle to better manage your tire assets. You can also track all casing through the re-treading process, crediting the unused portion of tire life to vehicle history.

**Warranties**—Lower overall costs by immediately flagging warranty repairs for vehicle, component, or replacement parts, as well as any asset of a major subsystem when opening a work order. You'll also have the ability to automatically create a warranty claim to your supplier.

## Drive greater fleet performance

Infor EAM Fleet Management drives greater fleet performance and profitability for forward-thinking transportation companies by helping them better track and manage their fleets. Capitalize on this comprehensive component to:

- Maximize vehicle lifecycles by reducing breakdowns.
- Track repair histories.
- Operate safely and efficiently.
- Create dependable management of asset warranties.
- Boost earnings and available operating capital.
- Adapt quickly to changing capital markets.
