

Jump-start your RCM initiative with the industry's largest Equipment Failure Code Registry

Every minute your business assets are down means lost services and revenue.

Built and refined for over 20 years, SwainSmith's Problem/Failure/Action/Codes provides maintenance operations vital insights into corrective maintenance activities. Our codes are equipment class specific, so you get deep and precise information about where problems are originating, which components are failing, and which failures are costing the most money.

Know your equipment: past, present, and future.

Identify

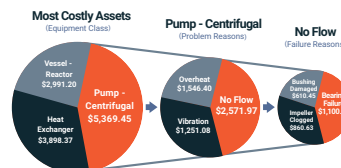

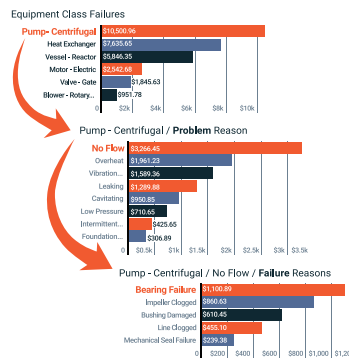

Know exactly what happened. Zero in on asset failures based on their equipment class, problem, and failure reason.

Report

Know how much it cost in time and money. Discover which action was taken, how frequently, and at what cost.

Predict

Know when it will happen again. Using the asset's work history record, accurately determine the optimum maintenance schedule.

Zero in on asset reliability issues with SwainSmith's Master Data Catalog™.

Forget the long development process. Build on our foundation and cut development time by 75%. Our coding library has been developed over 20 years to give you a rock-solid foundation for EAM/CMMS reliability reporting and analysis.

Equipment Failure Code Registry Benefits

- ① 2,000+ Problem/Failure/Action/Cause codes
- ② 200,000+ failure relationships
- ③ 200+ distinct equipment classes
- ④ Cuts your EAM's development time by 75%.
- ⑤ Provides a rock-solid foundation for asset reliability, reporting and analysis.
- ⑥ Gives you deep and precise information about failure causes and culprits.

SwainSmith's Equipment Failure Code Registry Helps You:

Lower Costs

Increase Reliability

Improve Productivity
