

Fast-track your EAM/CMMS initiative with SwainSmith's EAM Content Solutions.

We are an EAM content solutions firm. We help organizations develop rich and actionable EAM information. Our content libraries, resources and domain expertise can get your EAM system delivering complete, accurate and timely data.

Great EAM data is key to improving asset reliability and lowering MRO costs. However, developing great EAM data is no easy task. That is where SwainSmith steps in.

Step 1

We provide clients access to our digital EAM Library™. It's a comprehensive platform of industry-proven content and interactive resources that helps clients quickly establish EAM master and transactional data standards.

Our EAM Library™ consists of:

- The industry's largest asset class problem-failure-action code set
- Over 40 discrete EAM/CMMS coding structures, such as KPIs, dictionaries, taxonomies, etc.
- ISO 55000 compliant asset management practices, processes, and procedures
- Interactive platform to help you collect and cleanse MRO data
- Best practice audit platform helps you assess performance and close gaps

Our EAM Library is constantly updated with new codes and practices. Member organizations always have access to the latest and greatest.

Step 2

If clients need assistance implementing great data, we provide a comprehensive suite of services ranging from:

- Data Assessment & Design
- Data Collection
- Data Cleansing
- Data Analysis
- ISO 55000 Compliance

Our approach is pretty simple. We can give you the standards and you can do it yourself, or you can have us assist you. Either way, we get your EAM/CMMS data delivering the information you need to improve performance.

SwainSmith's EAM Content Solutions Help You:

Lower Costs

Increase Reliability

Improve Productivity
